Parts Marking Locations

To deter vehicle theft, certain major components are marked with the vehicle identification number (VIN). Original parts will have self-adhesive labels or labels attached with a break-off bolt. Replacement body parts will have self-adhesive labels, and replacement engine and transmission parts will be stamped with a code for spare parts.

NOTE:

- Label location letters without parenthesis indicate original parts. Letters with parenthesis indicate replacement parts.
- When welding, avoid prologed heat near the label.
- When painting, keep the masking tape over the label. Then remove the tape, when finished.
- When cleaning, do not use gasoline, thinner, kerosene, or other solvents near the label.

Sedan:

Marking Locations:

A and (A): Engine
Band(B): Transmission
C and (C): Front Bumper
D and (D): Hood
E and (E): Trunk Lid
F and (F): Rear Bumper
